TALENTS!

INTERNATIONAL ARTIST RESIDENCY PROGRAMME IN COOPERATION WITH FONDATION FIMINCO

Paris - Romainville

LAUNCH OF THE NEW PROGRAMME, T A L E N T S !

The Fondation FIMINCO launches **TALENTS!**, its new international artist residency program, in cooperation with an international network of private and public actors of contemporary creation.

THE FONDATION FIMINCO

Created in 2017, the Fondation FIMINCO is a resource center and a networking platform aimed at supporting visual artists and curators from across the world.

Through its artist residency, it provides the ideal context to engage in research and creative work through experimentation and interdisciplinarity, and to meet the challenges or our changing environment.

As an open laboratory and a living environment at the heart of a major cultural district, the foundation brings a very diverse community together, and encourages dialogue with artists, professionals, the education community and the general public.

PARIS CAPITAL OF THE ARTS

Today, Paris stands out as a unique platform for the production and dissemination of contemporary art. The City of Light owes this to its ability to welcome and support emerging artists as well as great names in creation from all over the world.

This vitality is due to the exceptional diversity of museums, galleries, foundations, and institutions that support and accompany these artists. The great success of the first edition of the International Paris + Art Basel art fair is an excellent example.

Thanks to its international influence and the dynamism of its cultural life, the Greater Paris metropolitan area is meeting the challenge of global attractiveness. As a driving force for the national economy, Greater Paris is a source of inspiration for art and culture in general, which contribute greatly to the development of the region.

The entire Île-de-France region is being transformed by art and culture, and this makes it possible to rethink the links between center and periphery. New creative venues generate new centralities, rehabilitating large spaces that had been underutilized.
